

OneWAN SASE

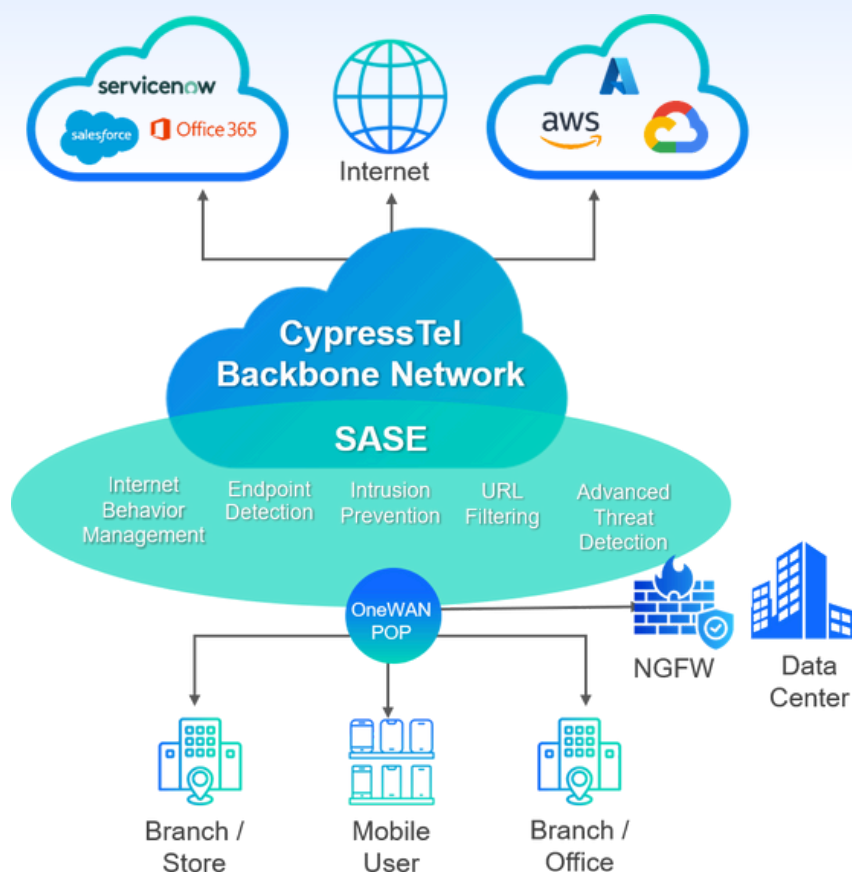

Revolutionize Networking with Secure, Scalable SASE

Digital threats require bold solutions. CypressTel's OneWAN SASE combines SD-WAN with advanced security, empowering telecom carriers to protect client networks and accelerate growth. Our cloud-native platform simplifies management, enhances performance, and ensures seamless connectivity across diverse global markets. Whether for remote work or cloud applications, we enable businesses to gain client trust and lead the digital era with unmatched agility and protection.

How It Works

SASE integrates SD-WAN with security, unifying routing, cloud access, and remote connectivity in a cloud-native platform. This streamlines client network operations.

Key Features & Benefits

Enterprise-Level Security

Our platform offers zero-trust access (ZTNA), Firewall-as-a-Service (FWaaS), CASB, and DLP, powered by AI-driven threat detection for unbreakable protection. Strict controls, encrypted data, and continuous monitoring safeguard your clients' networks, ensuring compliance and building trust in competitive markets.

Safety and Dependability

With a 99.99% SLA guarantee for uptime and support from our global SOC/NOCs with multilingual capabilities, our flexible pay-as-you-go delivery minimizes risks. This empowers carriers to provide reliable services fostering customer confidence and loyalty worldwide.

Extensive Network Coverage

We offer over 140 PoPs, service coverage across more than 300 cities, ensuring fast, stable connectivity. Our SD-WAN capabilities enable secure, scalable access to applications, allowing carriers to expand their client portfolios in diverse digital markets effortlessly.

Integration with SD-WAN

Our advanced security can be embedded into SD-WAN, consolidating processes and delivering cost savings. Businesses can simplify client networks, reduce deployment time, and enhance agility, positioning themselves as the preferred partners for modern connectivity.

Why CypressTel?

Choose CypressTel for a scalable, carrier-neutral network with over 140 PoPs globally, ensuring seamless connectivity. Our tailored solutions foster long-term success through AI-driven insights and 5G speed. With over 17 years of experience and the deployment of more than 10,000 customer sites, we optimize costs and enhance customer experiences, all backed by reliable 24/7 local support for high-performance results.
